Journal of Talent Development and Excellence

Journal of Talent Development and Excellence (JTDE) is the official scholarly peer reviewed journal. The articles contain original research or theory on talent development, expertise, innovation, or excellence. The Journal is currently published twice annually. All published articles are assessed by a blind refereeing process and reviewed by at least two independent referees. Users have the right to read, download, copy, distribute, print, search, or link to the full texts of articles.

The paper attempts to examine the effect of ownership structure on the Islamic corporate social responsibility (i-CSR) disclosure for Shari'ah Compliant Companies (ShCCs) in Malaysia. The Islamic corporate social responsibility (i-CSR) disclosure incorporated the five values of Maqasid Shari'ah and Maslahah. The content analysis was used to extract the i-CSR disclosure items from the ShCCs' annual reports. The sample of 1,122 annual reports of 187 ShCCs from 2018 until 2013 was used. The data was analysed using STATA, and the robust standard error of the panel corrected of standard errors (PCSEs) was used to examine the relationship between i-CSR disclosure and the ownership structure. Namely, foreign ownership (FO), government ownership (GO) and Muslim director ownership (MDO) after statistical control by firm size (proxy by total assets) and profitability (proxy by return on assets, net profit margin and return on equity). The result, based on the PCSEs, indicated that government ownership is positively and significantly correlated with the level of i-CSR disclosure. In contrast, foreign ownership and Muslim director ownership are negatively correlated with i-CSR disclosure. The finding implies the presence of a higher government ownership is able to enhance fulfilling the reporting principles of full disclosure and transparency. Pages 26 to 42

Pdf Whistleblower Dilemma: Individual and Situational Factors in Whistleblowing Intention

Muhamad Naufal^a, Alfira Sofia^b, Ida Farida Adi Prawira^c, R. Nelly Nur Apandi^d, ^{a,b,c,d}Accounting, Universitas Pendidikan Indonesia, Bandung, West Java, 40154, Indonesia, Email: ^amnaufal30.mn@gmail.com>mnaufal30.mn@gmail.com

This study aims to understand how individual and situational factors can influence the psychological condition of employees, which can affect the decision in conducting whistleblowing. This type of research is descriptive qualitative. The subjects of this study were the senior year students in the City of Bandung, Indonesia, who were undergoing an internship process. The sample collection technique used was purposive sampling. This research found that employees seek materiality and advantages by whistleblowing. Even though their whistleblowing output is not a success and has consequences, they believe that they did the right thing by whistleblowing because of their moral responsibility. With this research, companies can obtain a new perspective in preparing a whistleblowing system, culture, and atmosphere that is better for whistleblowers, so that the company they live in will be more protected from possible frauds. This study has limitations on the theory used in looking at aspects that affect individuals in conducting whistleblowing. This research can be developed by looking at other elements that are also related to determining an individual's intention in whistleblowing. Furthermore, different participants in the study would provide the possibility of different answers to this study. Pages 43 to 60

SCOPE

The JIPS is a peer-reviewed quarterly journal that publishes high-quality papers after subjecting them to a rigorous review process. It publishes diverse papers, including theoretical research contributions presenting new techniques, concepts or analyses; experience reports; experiments involving the implementation and application of new theories; and tutorials on state-of-the-art technologies related to information processing systems. In addition, the journal's editorial board selects featured articles with outstanding contributions and results, and introduces them on the journal's homepage. The subjects covered by this journal include, but are not limited to, topics related to a) computer systems and theory; b) multimedia systems and graphics; c) communication systems and security; and d) software systems and applications.

The **Journal of Information Processing Systems (JIPS)** is the official international journal of the Korea Information Processing Society. As information processing systems are progressing at a rapid pace, the Korea Information Processing Society is committed to providing researchers and other professionals with the academic information and resources they need to keep abreast with ongoing developments. The JIPS aims to be a premier source that enables researchers and professionals all over the world to promote, share, and discuss all major research issues and developments in the field of information processing systems and other related fields.

EDITORIAL BOARD

Most of the advisory board members are renowned scholars and editorial members of prominent international journals. The KIPS is devoted to improving the cultural diversity and geographical coverage of the editorial board; a number of members are renowned international figures as well as opinion leaders with a high personal impact factor. Using the experience they have acquired serving other renowned international journals, they actively shape and decide the ways as required to recruit high-quality papers.

Introducing CiteScore metrics for serials

We are proud to introduce CiteScore metrics for serials — comprehensive, current and free metrics for serial titles in Scopus. Search or browse below to find a source and see the new metrics. Use the annual metrics for reporting, and the CiteScore metrics for up-to-date tracking. Be sure to use qualified as well as the below quantitative inputs when presenting your research impact, and always cite more than one metric for the quantitative part.

Improved Citescore

We have updated the CiteScore methodology to ensure a more robust, stable and comprehensive metric which provides an indication of research impact, earlier. The updated methodology will be applied to the calculation of CiteScore, as well as retroactively for all previous CiteScore years (ie. 2018, 2017, 2016...).
